4:45-5pm	Closing	Zena Yusuf

High-Impact HIV Prevention
Capacity Building Assistance
for Healthcare Organizations

OUR PEOPLE, OUR PROBLEM, OUR SOLUTION

May 6, 2016

Dear Learning Collaborative participant,

Congratulations on your completion of the Atlanta PrEP Learning Collaborative! Your organizational participation was instrumental in its success. The Black AIDS Institute is fortunate for the opportunity to work with each of you, and we are pleased to present the successes and accomplishments of the Collaborative at today's meeting.

From the opening of Fulton County's PrEP clinic to the dramatic increase in PrEP referrals at every organization, we are delighted to report back what changes and improvements each organization has made since July 2015. More importantly, we would like to commend you for overcoming the obstacles during this process and using them as learning experiences.

The work you do is vitally important and necessary to curb the AIDS epidemic. With the CDC reporting one in two Black MSM will receive an HIV diagnosis in their lifetime, there is still much work to be done. While we are wrapping up the Learning Collaborative here in Atlanta, the Institute will still be very involved in the fight against HIV in Fulton County. To that end, we want the lines of communication to be open between each of your organizations and the Black AIDS Institute. To do so, we encourage each of you to join the BTAN Chapter here in Atlanta.

Our next PrEP Learning Collaborative will take place in Houston, Texas. As we end our Collaborative here, please let us know how this experience could have been improved for you. You will find an evaluation form in your folder, so please feel free to write your comments here or mention them to an Institute staff member.

Finally, although our project is coming to a close, we would like to remind you of the opportunity to request capacity building services any time. If you have any questions about this or anything else, please feel free to contact Zena Yusuf at zenay@blackaids.org or 213-353-3610 x120. Thank you again for your time and dedication.

Yours in the struggle,

Phill Wilson
